Cookie Notice

Version of 10.11.2026

This is a translation for convenience. The Russian text is legally binding.

Terms are used as defined in the Personal Data Processing Policy. “Visitor” means an individual who uses the Website or the Personal Account.

Apart from the `sr_stats` cookie, which stores the Visitor's choice regarding visit statistics, the Website https://sayril.ru and the Personal Account https://sayril.ru/en/account/ use only strictly necessary cookies. Cookies are not used for advertising or tracking. Until the Visitor makes a choice, the pages about the Program and the documents open without cookies.

Cookie	Where	Purpose	Duration
`__Host-sr_session`	Personal Account	keeps the sign-in to the user account	until sign-out or until 4 hours of inactivity, but no longer than 30 days after sign-in; the browser keeps the file itself for no longer than 14 days after the last action
`__Host-sr_csrf`	Personal Account	protects the Personal Account forms against cross-site request forgery	7 days
`sr_stats`	entire Website	stores the Visitor's choice regarding visit statistics: `1` (allowed) or `0` (refused); contains no other information	1 year

Session information associated with the user account is processed by the Operator in accordance with the Personal Data Processing Policy (Purposes 6 and 7). The Visitor has the right to delete cookies or block them in the browser settings; without the strictly necessary cookies, signing in to the Personal Account and placing an Order do not work, and without `sr_stats`, the Website asks about statistics again. After a new version of this Notice is released, the Website asks about statistics anew.

This Notice applies only to the Website and the Personal Account. The Operator starts using other cookies only after publishing a new version of this Notice; non-essential cookies are enabled only at the Visitor's choice.

Visit statistics

Visit statistics are optional and turned off by default. They are turned on only if the Visitor has clicked “Agree” or has ticked “Visit statistics” in the “Cookie settings” window. Closing the window with the cross means refusal.

If statistics are allowed, when a page is opened, the following are counted: the page address without parameters, the referring website, the link tags (utm) from the Operator's list of campaigns, the device class (computer, phone, or tablet), and the browser name. They are counted only in daily

totals: the network address, the full browser string, and the Visitor identifier are not recorded in the statistics, so the totals cannot be used to determine who opened the page. Statistics are not kept in the Personal Account or when an Order is placed.

The choice can be changed at any time via the “Cookie settings” link at the bottom of each page. Refusal takes effect immediately. The Website works the same regardless of the choice. The technical log (Purpose 7 of the Policy) is kept regardless of the choice.
